

Game Jam Workshop

with LiU Game Jam

- Brainstorming
- Art and Graphics
- Making a game in Godot

Brainstorming

- Theme generation
- Pitching ideas

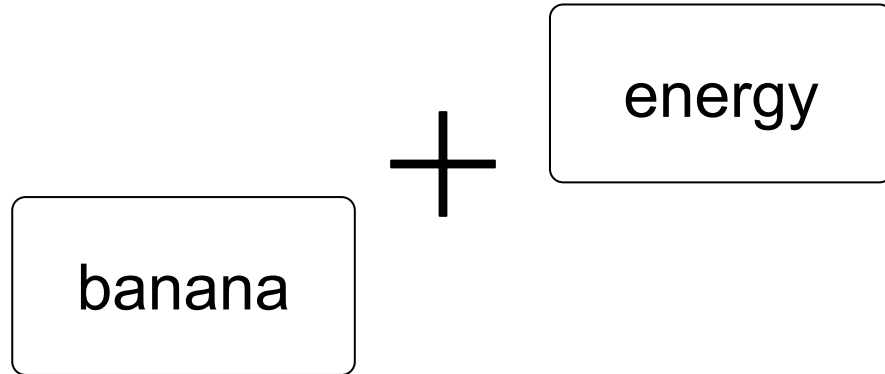

Theme generation

Theme generation

banana

Theme generation

Theme generation

BANANA ENERGY

Brainstorming phase

- 10 minutes
- Pitch ideas to each other
- Present one of them at the end
- Names are important!
- More ideas are better

Today's brainstorming session

Our theme for today is...

Today's brainstorming session

Our theme for today is...

SPACED TRAINS

Spaced trains

- Try to consider different interpretations
 - Trains: choo-choo
 - Trains: someone who is training
 - Spaced: something in space
 - Spaced: (swedish slang) cool, trendy
 - Spaced: with spaces in-between
 - Spaced: spacebar
 - etc

Svenska Akademiens ordlista

spejs·ad adjektiv *spejsat ~e*
• (vard.) trendig, häftig

Time to brainstorm

Brainstorming tips and tricks

- Start by trying out as many ideas as you can. The first is rarely the best!
- You don't have to figure out the entire game immediately.
- What kind of feel should the game have?
- Consider alternative theme interpretations
- A good name makes the game!

Game Jam Art and Graphics

How to make reasonable art
without talent

- Color and shape theory
- Artstyle
- Tools

Color and Shape Theory

Color terminology

- Color wheel

- Hue 
 - Where on the color wheel is the color
- Saturation 
 - The intensity of the color
- Value 
 - How light / dark is the color

- Hue 
 - The “pure” color with full saturation and no darkness
- Tint 
 - Pure color + white
- Tone 
 - Pure color + gray
- Shade 
 - Pure color + black

Colors, feelings and temperature

- “warm” colors → “warm” feelings
- “cold” colors → “cold” feelings
- Other correlations exist
 - Happy = yellow
 - Blue = sad
 - ...

Color palettes

- Monochromatic
 - One hue
 - Tint, tone and shade vary
- Analogous
 - “Wide” monochromatic
- Complementary
 - Opposite hues
- Split-Complementary
 - Complementary + analogous
 - Easiest to make visually pleasing
- Online tools
 - [colors.co](https://www.colors.co)
 - [colorhunt.co](https://www.colorhunt.co)
 - ...

Limit your color palettes! (the biggest secret for great game art)

- Create a small palette using the previous examples and stick to only those colors
- Many games utilise this
 - Retro and modern

Shape theory

- Similar to color theory and psychology
- Triangle
 - Sharp
 - Power
 - Danger
- Square
 - Stability
 - Strong
 - Balance
- Circle
 - Organic
 - Soft
 - Unity

Dissonance

- Opposite of harmony
 - Feelings of unease
- Childish and chaotic
- Both color and shape

RED ON BLUE

BLUE ON RED

RED ON CYAN

CYAN ON RED

RED ON GREEN

GREEN ON RED

Artstyle

Pixel art

- Very stylized and can be very simple
- Decide the resolution early!
- Easy to do even without a drawing tablet
- Still many different styles within it!

“Programmer art”

- Embrace the “unfinished” look and have fun
- This is NOT bad art, it is just not polished
- Simple and comes without pressure

Consistency and reasonability

- It's a game jam, you have a limited time budget
- Limit yourself to a quality you can keep up for 10+ pieces of art, better to have 10 consistent sprites than 1 gorgeous and 9 rushed
- The art does not stop at the sprites/models/textures, the UI is a part of the visual experience too
- Utilise external resources, if using stock photos or AI art gives the visual story you want use them!

Tools

Digital tools

- Krita ★
 - Free and works on most systems
 - Powerful tool with support for vectors, rasterized art, animation, pixel art, and more
 - Can download brushpacks from the community
- Clip Studio Paint
 - Free trial but not officially supported for Linux
 - Powerful tools and well established
- Procreate
 - iOS specific and not free
 - Powerful tool with many features
 - Simple interface
- Ms Paint
 - Windows specific (online version exists) and Free
 - Simple and restrictive
- Gimp
 - Free and works on most systems
 - Designed for photo-editing
- Piskel
 - Free online tool (offline tool available too)
 - Pixel art specific
 - Animation support
- Many more tools exist! use the one that suits you

Physical mediums

- Watercolor, pen and paper, acrylics, ...
- Have a decent camera or scanner available
- Some touch ups might need to be made digitally
- Stay creative and if you are more comfortable with physical mediums, you can always stick with them

Time for a break...

Now, let's make a game!!
